

Trilogy Machinery sells World's Largest Angle Bending Roll, ROUND0 Model R-16S

Belcamp, MD - Trilogy Machinery, Inc. the Exclusive North American Distributor for ROUND0 Bending Rolls of Sweden, announces the sale of the ROUND0 Model R-16S, the World's Largest Angle Bending Roll, to Greiner Industries in Mt. Joy, Pennsylvania.

The Model R-16S has the capacity to roll up to 44" beams both the easy way (Y-Y axis) and the hard way (X-X axis). The Model R-16S can roll an HEB 1000 beam, equivalent to a W40" x 211 pound beam, to a radius under 100' with virtually no distortion. This 235,000 pound monster can also roll 26" OD pipe with 2" wall thickness and virtually any square or rectangular tube available.

In the field of Angle and Section Bending Machines, ROUND0 has been the undisputed leader for more than 40 years. The technology and know-how at ROUND0 is a result of the experience gained building larger and larger section bending machines over many years, based on their close working relationship with all the leading section bending companies around the world.

ROUND0 bending rolls from Sweden are distributed by Trilogy Machinery, Inc., their exclusive North American agent. Trilogy personnel have over 100 years of experience working with ROUND0 bending rolls, and are responsible for supporting and servicing almost 4,000 ROUND0 rolls currently in use throughout the United States, Canada, Mexico and the Caribbean. The web site for ROUND0 is www.roundo.com and the Trilogy web site is www.trilogymachinery.com.
